Take the plants that have been tested in the neighborhood, and are therefore known to grow; if there are none send for a well known variety.

In preparing your ground, spade it deep; make it thoroughly mellow; this must not be neglected. Spade it when dry. Any moderately rich soil will do. If a little richer than that, it will do; but not too rich. Of course it must not be a wet spot.
Your ground is ready. Now take your

plants and clip off the roots to within about three or four inches of the crown. Remove the ground where the plant wants to set, to the depth of only about half an inch or three-quarters. Scrape the place (the hill) broad enough to set your plant with the cliped roots all spread (radiated) with a little rounding of the soil, so as to set the plant on like a cap somewhat. Then replace your ground, and pack pretty solid. Your planting is done, but not your work. Now water every hill. This will settle the ground, and bring it to its natural state. Mulchit at once. The best mulch. as we before recommended for general purposes, is fine manure, say half an inch thick. You may apply your water after instead of before mulching.

To secure success more thoroughly, mulch between the rows (which should be between two and three feet apart-a little nearer in the rows)-mulch with straw, which will prevent the mositure from evaporating, more perhaps than any other mulch. Mulch till up to the stem; but not till just before the fruit begins to ripen, or swell out.

Where large grounds are put out, less pains are generally taken. It such cases provision must be made against the

The Secretary of the Treasury has not ver given notice of any intention to withdraw this r ular Loan from Sales at Par, and until ten day notice is given, the undersigned, as " General Subscription Agent," will continue to supply

The whole amount of the Loan anthorized is Five Hundred Millions of Dollars. Nearly Four Five Hundred Millions of Dollars. Nearly Four Hundred Millions have been already subscribed for and paid into the Treasury, mostly within the last seven months. The large demand from abroad, and the rapidly increasing home demand for use as the basis for circulation by National Banking Associations, organizing in all parts of the country, will, in a very short period, absorb the balances. Sales have lately ranged from ten the balances. Sales have lately ranged from ten to fifteen millions weekly, frequently exceeding three millions daily, and it is well known that the Secretary of the Treasury has ample and unfailing resources in the Duties on imports and Internal Reveaues, and in the issue of the Interest bearing Legal Tender Treasury Notes, it is almost a certainty that he will not find it necessary, for a long ime to come, to seek market for any other long or

ermanent Loans, THE INTEREST AND PRIN-CIPAL OF WHICH ARE PAYABLE in GOLD. Prudence and self interest must force the minds those contemplating the formation of National Banking Associations, as well as the minds of all who have idle money on their hands, to the prompt onclusion that they should lose no time in subscribing to this most popular Loan. It will soon premium, as was the result with the "Seven longer be subscribed for at par.

It is a Six per Cent Loan, the Interest and Prin cipal Payable in Coin, thus yielding over Nine per and per annum at the present rates of premium

o be paid in Coin; these duties have for a long ime past amounted to over a Quarter of a Million Dollars daily, a sum nearly three times greater than that required in the payment of the interest on all the 5-20's and other permanent Loans. So that it is hoped that the surplus Coin in the Treasury, at no distant day, will enable the United States to resume specie payments upon all lia-

bilities. the Bonds may run for 20 years yet the Government has a right to pay them off in Gold at par, at

my time after 5 years. THE INTEREST IS PAID HALF-YEARLY, viz : on the first days of November and May. Subscribers can have Coupon Bonds, which are payable to bearer, and are \$50, \$100, \$500 and \$1000 : or Registered Bonds of same denomina tions, and in addition, \$5 000, and \$10 000. Fo Banking purposes and for investments of Trust

ionies the Registered Bonds are preferable. These 5-20's cannot be taxed by States, cities towns, or counties, and the Government tax on them is only one and a half per cent, on the amount of income, when the income of the holder exceeds Six Hundred Dollars per annum; all other investments, such as income from Mortgages, ilroad Stock and Bonds, etc., must pay from

three to five per cent tax on the income. Banks and Bankers throughout the Country will ontinue to dispose of the Bonds; and all orders by mail, or otherwise, promptly attended to. delivery of the Bonds are unavoidable, the demand being so great; but as interest commences from the day of subscription, no loss is occasioned, and every effort is being made to diminish the

SARSAPARILL

Nothing afforded any relief until we tried your S. as SAFARILLA, which soon completely tured ber."

From Charles P. Gage, Esq., of the widely known for of Gage, Murray & Co., manufacturers of chamelled papers in Nathua, N. H.

"I had for several years a very troublesome him or in my face, which grew constantly worse until disfigured my features and became an intolerable affliction. I tried almost everything a man could oboth advice and medicine, but without any salisa whatever, until I took your SARATARILLA. I immediately made my face worse, as you fold me might for a time; but in a few weeks the new skip began to form under the blotches, and continued until my face is as smooth 2s any body 2s, and I swithout any symptoms of the disease that I know of. I enjoy perfect health, and without a doubt owe it to your SARAFARILLA."

best medicines we have." From A. J. French, M. D., an eminent physicism of Luwrence, Mass., who is a prominent member of the Legislature of Massachusetts. "Dn. Aven—My dear, Sir: I have found your

SARSAFAHILLA an excellent remedy for Symbilic both of the primary and secondary type, and effect and in some cases that were too obstinate to yield to other remedies. I do not know what we can employ with more certainty of success, where a power ful alterative is required." In alterative is required."

Mr. Char. S. Van Liew, of New Brunsreck, N. J., had dreadful ulcers on his legs, caused by the shure of mercury, or marcurial disease, which grew more and more aggravated for years, in spite of every remedy or treatment that could be-applied, until the persevering use of Ayen's Sahbapanilla relieved him. Few cases can be found more investment and distressing than this, and it took several dozen bottles to cure him.

Leucorrhoes, Whites, Female Weakness, are generally produced by internal Serofalous Uceration, and are very often cured by the alterative effect of this Sansararilla. Some cases require, however, in aid of the Sansararilla, the skifful application of local remedies.

From the well-known and widely-celebrated Dr. Local Morrell of Science 11.

From the well-known and widely-celebrated Dr. Jacob Morrill, of Cincinnati.

"I have found your Sakkapanilla in excellent alterative in diseases of females. Many cases of irregularity. Leveorrhma, Internal Ulceration, and local debility, arising from the scrothlous disthests, have yielded to it, and there are few that do not, when its effect is properly aided by local treatment."

A lady, unwilling to allow the publication of her name, writes:

"My daughter and myself have been cured of a very debilitating Lemoorrhom of long standing, by two bottles of your Saksapanilla."
